

Listening Comprehension Activity: Top 3 Tech Careers for 2025

Video Link: https://www.youtube.com/watch?v=fZmQ_aPXJAM

Instructions: Watch the video "Top 3 Tech Careers for 2025 - High Salary & In Demand" by Code with Mosh and complete the following exercises.

Part 1: Multiple Choice (10 questions)

1. According to Mosh, which of the following is NOT a key factor for a great career?
 - a) High salary
 - b) Being in demand
 - c) Challenging work
 - d) Having a clear roadmap
2. What is the first tech career Mosh highlights in the video?
 - a) Data Scientist
 - b) Software Engineer
 - c) Cybersecurity Analyst
 - d) Cloud Architect
3. What skill is particularly important for software engineers according to the video?
 - a) System administration
 - b) Database management
 - c) Problem-solving
 - d) Network security
4. Which of these is NOT mentioned as a task typically performed by a cloud architect?
 - a) Migrating on-premise infrastructure to the cloud
 - b) Managing cloud infrastructure
 - c) Developing new software applications
 - d) Automating tasks on the cloud
5. What is one of the primary responsibilities of a cybersecurity analyst?
 - a) Developing new software applications
 - b) Protecting computer systems and networks from cyber threats
 - c) Managing cloud infrastructure
 - d) Creating marketing strategies for tech companies
6. According to Mosh, what is a key advantage of cloud computing for businesses?
 - a) Increased security
 - b) Lower costs
 - c) Better user interface
 - d) Faster internet speeds
7. Which programming language does Mosh specifically mention as being useful for cloud architects?
 - a) Java
 - b) Python
 - c) C++
 - d) Ruby
8. What does Mosh suggest as a good starting point for those interested in cybersecurity?
 - a) Getting a computer science degree
 - b) Learning ethical hacking

- c) Starting with network security
 - d) Focusing on cloud security first
9. Which soft skill does Mosh emphasize as important for all three careers?
- a) Public speaking
 - b) Time management
 - c) Communication
 - d) Leadership
10. What does Mosh recommend as a way to gain practical experience in these fields?
- a) Internships
 - b) Building personal projects
 - c) Reading textbooks
 - d) Watching online tutorials

Part 2: True or False (8 questions)

- 1. True or False: According to the video, a software engineer's job involves only writing code.
- 2. True or False: Cloud Architects need to be proficient in at least one programming language.
- 3. True or False: The cybersecurity field is expected to have decreased demand in the future.
- 4. True or False: Mosh provides specific salary ranges for each of the tech careers mentioned.
- 5. True or False: Having good soft skills is important for a career in tech.
- 6. True or False: Mosh suggests that cloud computing is a passing trend in the tech industry.
- 7. True or False: According to the video, cybersecurity analysts don't need to understand business operations.
- 8. True or False: Mosh recommends focusing on only one area of expertise in tech careers.

Part 3: Short Answer (5 questions)

- 1. What does Mosh emphasize about the importance of finding a mentor and community?
- 2. Briefly describe why cloud architects are in high demand.
- 3. What kind of soft skills are crucial for the cybersecurity analyst role?
- 4. How does Mosh suggest viewers can start learning about these tech careers?
- 5. What advice does Mosh give about choosing between these three career paths?

Part 4: Fill in the Blanks (5 questions)

Fill in the blanks with the correct words or phrases from the video:

- 1. Software engineers need to be good at _____ and _____ complex problems.
- 2. Cloud architects help companies _____ their on-premise infrastructure to the cloud.
- 3. Cybersecurity analysts need to stay up-to-date with the latest _____ and _____.
- 4. Mosh suggests that viewers should focus on building a _____ of projects to showcase their skills.

5. According to Mosh, having a clear _____ is important for progressing in your tech career.

Part 5: Vocabulary Matching (8 words)

Match the words from the video with their definitions:

1. On-Premise
2. Infrastructure
3. Scalability
4. Vulnerability
5. Threat
6. Migrate
7. Automate
8. Ethical hacking

Definitions:

- a) A weakness in a system that can be exploited.
- b) A danger that can exploit a vulnerability.
- c) Ability of a system to handle increased workloads.
- d) The basic physical and organizational structures needed for the operation of a society or enterprise.
- e) Located within the physical confines of an organization.
- f) To move from one place or system to another.
- g) To convert a process or facility to operate automatically.
- h) The practice of testing a computer system, network, or web application to find security vulnerabilities that an attacker could exploit.
