

Listening Comprehension - Cyber Security Essentials

Level: C1–C2

Estimated Duration: 2 sessions

Focus Skills: Listening Comprehension, Technical Vocabulary, Grammatical Analysis (Passive Voice, Conditionals), Oral Production

Activity Overview:

In this activity, you will watch a short but informative video explaining the fundamentals of cybersecurity. You will practice your listening comprehension, identify key technical vocabulary, analyze how certain grammatical structures can be used to discuss these topics, and finally, present your understanding orally.

- Title: Cyber Security In 7 Minutes
 - Watch here: <https://www.youtube.com/watch?v=inWWhr5tnEA>
-

Session 1: Understanding the Basics

Objectives:

- Understand the main concepts presented in the video.
 - Identify and define key cybersecurity terminology.
 - Practice detailed listening comprehension.
-

Tasks:

1. Introduction:

- Briefly discuss: What do you already know about cybersecurity? Why is it crucial in IT?
-

2. First Viewing - General Understanding:

- Watch the video through once without stopping. What is the main message?
-

3. Second Viewing - Detailed Comprehension & Note-Taking:

- Watch the video again, pausing as needed.
- Take detailed notes.
- Answer the following Comprehension Questions (prepare your answers for discussion/submission):

 - According to the video, what is the core definition of cybersecurity?
 - Name and briefly describe *three* distinct types of cyberattacks mentioned.
 - What are *three* specific best practices recommended to improve cybersecurity?
 - What potential consequences can cyberattacks have for individuals and organizations?
 - What does the video suggest about career paths in cybersecurity?

4. Vocabulary Focus:

- Identify at least 5 key technical terms or phrases related to cybersecurity used in the video (e.g., malware, phishing, encryption, vulnerability, firewall, etc.).
 - Define each term in your own words, perhaps providing a brief example of its use based on the video or your knowledge.
 - Be prepared to share and discuss these terms.
-

5. Preparation for Session 2: Review your notes, comprehension answers, and vocabulary list. Think about how you would explain these concepts to someone else.

Session 2: Analysis and Oral Production

Objectives:

- Consolidate understanding of the video content.
 - Analyze how advanced grammatical structures (like passive voice or conditionals) can be used effectively when discussing cybersecurity topics.
 - Practice summarizing technical information orally using appropriate vocabulary and grammar.
-

Tasks:

1. Review & Consolidation:
-

- Quickly review the main points, vocabulary, and any questions arising from Session 1.
-

2. Grammar in Context :

- Discussion: While the video is short and direct, cybersecurity topics often involve passive voice (e.g., "*Data can be stolen*", "*Systems are protected*") and conditionals (e.g., "If you click on a phishing link, your credentials *might be compromised*").
 - Think about the topics in the video (attacks, protection, consequences). How could you rephrase some of the ideas *using* passive voice or conditional sentences (0, 1st, 2nd, 3rd) to add nuance or formality? (e.g., "Phishing attacks *are used* to trick users." / "If proper security measures *had been taken*, the breach *might have been prevented*.")
 - Share some examples with the class or in small groups.
-

3. Oral Production Preparation:

- Prepare a short (2-3 minute) oral summary or reflection based on the video. You can choose one of these options:
-
- Summarize the most important cybersecurity threats and preventive measures mentioned.
 - Discuss the impact of cyberattacks and the importance of cybersecurity careers.
 - Reflect on one specific aspect of the video you found most interesting or relevant to your studies.
-

-
- Requirement: Aim to consciously include at least 2 examples of passive voice and 1 conditional sentence in your presentation. Use some of the technical vocabulary identified in Session 1.
-

4. Oral Presentations & Feedback:

- Deliver your oral presentation individually or in pairs/small groups.
 - Listen actively to your peers.
 - Provide constructive feedback focusing on clarity, accuracy, vocabulary usage, and the correct application of passive voice/conditionals.
-

Submission:

- **Submit your written answers to the Comprehension Questions and your Vocabulary List (with definitions) as a single Word document or PDF.**
-

Evaluation Criteria:

- **Listening Comprehension:** Accuracy and detail in answering comprehension questions.
 - **Vocabulary:** Correct identification and definition of relevant technical terms.
 - **Grammatical Analysis & Use:** Understanding of how passive/conditionals apply, and correct usage in the oral presentation.
 - **Oral Production:** Clarity, fluency, accurate summary/reflection, and appropriate use of technical vocabulary in the presentation.
-
