

Activities on "so" and "such"

Grammar Explanation for "So" and "Such"

"So" and "such" are intensifiers that add emphasis, often to show surprise or strong feelings. They are used to highlight the degree or extent of something.

1. "So" + Adjective/Adverb

- Used with adjectives or adverbs to intensify their meaning.
*Example: The network was **so slow** that no one could work.*
Structure: so + adjective/adverb (+ that clause)

2. "Such" + Noun Phrase

- Used with noun phrases (a noun + its modifiers) for emphasis.
*Example: It was **such a difficult task** that they needed help.*
Structure: such + (a/an) + adjective + noun (+ that clause)

Common patterns:

- "So" focuses on adjectives/adverbs (*so helpful, so quickly*).
- "Such" focuses on noun phrases (*such a complex system, such problems*).

Activity 1: Complete the sentences

Fill in the blanks with 'so' or 'such':

1. The error log was ___ detailed that we solved the issue quickly.
2. They implemented ___ a powerful firewall that no one could hack it.
3. This software is ___ user-friendly!
4. We faced ___ an unusual issue with the router yesterday.
5. The process was ___ complicated that we needed extra help.
6. It was ___ a massive project that it took weeks to complete.
7. The technician was ___ skilled that he fixed the issue in minutes.
8. The system upgrade caused ___ chaos in the office!
9. She spoke ___ clearly that everyone understood the instructions.
10. It was ___ an excellent presentation that the manager applauded.

Activity 2: Sentence transformation

Rewrite the following sentences using "so" or "such" to add emphasis:

1. The server is very fast.
→ The server is **so fast** that it completes tasks in seconds.
2. This was a very complicated diagram.
→ It was **such a complicated diagram** that the team needed clarification.
3. The technicians worked very efficiently.
→ The technicians worked **so efficiently** that they finished ahead of schedule.
4. It was a very stressful situation for the team.
→ It was **such a stressful situation** for the team that they had to take a break.

5. The hardware is very outdated.

→ The hardware is **so outdated** that it's no longer compatible with modern software.

6. The database had very sensitive information.

→ The database had **such sensitive information** that it required extra security.

7. The meeting was very boring.

→ The meeting was **so boring** that half of the participants lost focus.

8. The interface was very intuitive.

→ It was **such an intuitive interface** that even beginners could use it.

Activity 3: Technical role-play

Instructions:

1. **Pair Up:** Students will work in pairs. One person plays the role of the **technical expert**, and the other plays the role of the **client**.
2. **Choose a Topic:**
 - A **cyberattack** (e.g., phishing or ransomware).
 - A **network system failure** (e.g., a server crash or connection downtime).
 - The **installation of new software** (e.g., an operating system upgrade or security patch).
3. **Create a Scenario:** Spend 5 minutes together creating a short scenario based on the topic. Use these guiding questions:
 - What happened?
 - What was challenging?
 - What actions were taken to solve the issue?
4. **Role-Play the Conversation:**
 - The **expert** explains the situation to the **client**. Use at least **three examples of 'so'** and **three examples of 'such'** in your explanations.
 - The **client** asks follow-up questions to show understanding or to seek clarification.

Example Dialogue:

Expert: "The attack was so well-coordinated that it took down our entire system in just a few minutes!"

Client: "That sounds terrible. How did you manage to handle it?"

Expert: "We had to act quickly. It was such a stressful situation for the team, but we managed to isolate the issue."

Client: "Were there any long-term consequences?"

Expert: "Yes, the data breach was so severe that we had to implement new security protocols immediately."
