

Tech Pioneers: Discovering the Stories of Women Who Transformed the Digital World

Objective

Instructions: Read the direct quotes related to Ada Lovelace's life and rewrite them using reported speech.

Example:

- Direct Speech: Ada Lovelace said, "The Analytical Engine has no pretensions whatever to originate anything."
- Reported Speech: Ada Lovelace said that the Analytical Engine had no pretensions whatever to originate anything.

Now try these:

1. Ada Lovelace said, "I wish to bequeath to the generations a calculus of the nervous system."
2. Charles Babbage stated, "Ada Lovelace understood the Analytical Engine better than anyone else."
3. A historian explained, "Ada Lovelace was one of the first to recognize that machines could manipulate symbols, not just numbers."
4. Ada once wrote, "My brain is something more than merely mortal, as time will show."
5. A researcher said, "Lovelace's notes included what is recognized as the first algorithm intended to be executed by a machine."

Activity 2: Passive Voice - Rewriting Sentences

Instructions: Convert the following active voice sentences into passive voice to focus on the action rather than the subject.

Example:

- **Active:** Charles Babbage designed the Analytical Engine.
- **Passive:** The Analytical Engine was designed by Charles Babbage.

Now try these:

1. Ada Lovelace wrote extensive notes on the Analytical Engine.
2. Historians recognize Ada Lovelace as the first computer programmer.
3. Scientists have studied Lovelace's contributions for decades.
4. A biography about Ada Lovelace inspired many young women to pursue careers in STEM.
5. Researchers have preserved Lovelace's original notes in a British museum.

Activity 3: Mixed Practice - Reported Speech & Passive Voice

Instructions: Rewrite each sentence using both reported speech and passive voice.

Example:

- **Direct Speech:** A historian said, "Ada Lovelace wrote the first algorithm for a computer."
- **Reported & Passive:** A historian said that the first algorithm for a computer was written by Ada Lovelace.

Now try these:

1. A professor stated, "Ada Lovelace influenced modern programming languages."
2. A computer scientist explained, "Historians have acknowledged Ada's vision of general-purpose computing."
3. The documentary mentioned, "People have underestimated Lovelace's contributions for many years."
4. A researcher said, "Mathematicians admired Ada Lovelace's insights."
5. The lecturer told us, "Scholars have translated Ada's notes into multiple languages."

Research and present information about influential women in technology, focusing on their contributions and legacy.

Task Instructions

1. Selection

Choose at least three women who have made significant contributions to technology. One of them must be Ada Lovelace.

2. Research

For each woman, investigate:

- Her life and education.
- Her major achievements.
- The challenges she faced.
- The impact of her work on technology.

3. Language Use

Your presentation must include:

- At least five phrasal verbs.
- Three examples of reported speech.
- Three sentences using the passive voice.

4. Citation Guidelines

You must properly cite all your sources using APA format. Below are simplified examples of how to cite different types of sources:

Direct Quote:

Include the quote within quotation marks, followed by the author, year, and page number in parentheses.

Example:

"Education, as a socially conceived system, is a system for humanizing people" (Gárate, 2000, p. 100).

Citing Internet Sources (APA Format):

When citing a website, follow this format:

Author or Organization. (Year, Month Day). Title of the webpage. Site Name. URL

Example:

National Aeronautics and Space Administration (NASA). (2021, July 29). Katherine Johnson: A Hidden Figure Who Helped America Reach for the Stars. NASA.gov.
<https://www.nasa.gov/katherine-johnson>

Presentation Instructions

Create a clear and well-organized presentation using PowerPoint, Google Slides, or Prezi. Your presentation should include images and relevant examples to support your findings.

Evaluation Rubric

Criteria	Excellent (90-100%)	Good (80-89%)	Fair (70-79%)	Needs Improvement (60-69%)
Research Quality	Comprehensive research with in-depth analysis of each selected figure, demonstrating a deep understanding.	Good research with relevant information, though some aspects could be further explored.	Adequate research, but some areas are superficial; lacks depth in analyzing contributions.	Limited or incomplete research; missing key information about selected figures.
Language Use	Accurate and varied use of	Proper use of required	Limited or forced use of	Little to no use of required

	phrasal verbs, reported speech, and passive voice, integrated naturally into the text.	structures, though some inaccuracies or lack of variety.	required structures; some errors affect clarity.	structures; multiple grammar mistakes that hinder comprehension.
Organization & Clarity	Well-structured presentation with a clear, logical flow and effective visual elements.	Well-organized presentation with minor inconsistencies; visuals used appropriately.	Basic organization with inconsistencies; visuals present but not well-integrated.	Poorly structured presentation; difficult to follow; lack of visual support or ineffective use of visuals.
Citation & Sources	All sources are properly cited in APA format; demonstrates use of credible and varied sources.	Most sources are correctly cited, with minor formatting inconsistencies; adequate but limited variety.	Some sources are missing or incorrectly cited; sources may lack credibility or diversity.	No citations or incorrect formatting; unreliable or missing sources.
