

Body Scan Meditation

Sit in a comfortable position and bring attention to your body
close your eyes if that's comfortable for you
you can notice your body seated
wherever you are feeling the weight of your body,
on the chair or on the floor take a few deep breaths
breathe in through your nose 1 2 3 4
breathe out through your mouth 4 3 2 1
breathe in through your nose 1 2 3 4
breathe out through your mouth 4 3 2 1

Now bring your attention to the **top of your head**,
sense this area, what do you feel?
stillness or a feeling running through your hair
breathe and as you breathe relax the top of your head
continue to breathe and move your attention to the side of your head in your **ears**, what do you sense? Do you hear anything?
now bring your attention to the **neck and throat**
let them be soft, relax, soften your **jaw**
let your face and facial muscles be soft
smile softly and gently
notice your **back** against the chair
bring your attention into your **stomach** area
if your stomach is tense or tight, let it soften, take a breath
notice your **hands**, are your hands tense or tight?
see if you can allow them to soften
notice your **arms**, feel any sensation in your arms
let your **shoulders** be soft
bring your attention to your **legs and** your **feet**

feel your feet touching the ground and making a connection with it

now notice your whole body present

take one more breath,

be aware of your whole body as best you can take a breath and then when you're ready you can open your eyes.
