

VOCABULARY DEFINITIONS

Latency

Informal: "Latency is like the time it takes for a message to get from your phone to your friend's phone. If it takes too long, it's like having a slow conversation."

Formal: "Latency refers to _____. High latency can _____."

Throughput

Informal : "Throughput is like how many cars can pass through a toll booth in an hour. More cars mean better throughput."

Formal: "Throughput is _____. Higher throughput indicates _____."

Bottleneck

Informal: "A bottleneck is like when you're in a traffic jam because there's only one lane open. It slows everything down."

Formal: "A bottleneck occurs when _____, causing _____."

Load Balancing

Informal : "Load balancing is like having multiple cashiers at a store so that no one line gets too long. It keeps things moving smoothly."

Formal: "Load balancing is the process _____."

Bandwidth

Informal: "Bandwidth is like the width of a highway. The wider it is, the more cars can travel at the same time."

Formal: "Bandwidth refers to _____. Higher bandwidth _____."

Jitter

Informal: "Jitter is like when you're watching a video and it keeps skipping or stuttering. It's super annoying."

Formal: "Jitter is _____. High jitter can affect _____."

Packet Loss

Informal: "Packet loss is like sending a message in a bottle and some of the bottles never make it to the other side."

Formal: "Packet loss occurs _____. This can result in _____."
